

ULTRASIGHT™

INTELLIGENT PIGGING

SEE MORE. KNOW MORE. ACT WITH CONFIDENCE.

UltraSight™ is a next-generation, AI-powered intelligent pigging system delivering the highest resolution internal inspection of process piping, transfer lines, furnaces, boilers and pipelines — including assets considered "unpiggable".

TRULY MODULAR
BY DESIGN

Our patented modular architecture delivers rapid tool reconfiguration for virtually any application or operational scenario. Rather than compromising with a one-size-fits-all solution, each tool is precisely optimized—both mechanically and electronically—to meet the unique demands of every inspection, delivering reliable first-run success.

BUILT FOR
"UNPIGGABLE" ASSETS

Designed for unrivalled flexibility and manoeuvrability, the UltraSight confidently negotiates complex pipeline configurations that defeat conventional inspection tools. From tight back-to-back 1D bends and unbarred tees to diameter changes and internal obstructions, it delivers dependable inspection where other technologies cannot.

RAPID
MOBILISATION

Speed is built into every deployment. Our standardised modular architecture and stocked component inventory eliminate bespoke manufacturing, enabling mobilization within 24 hours. Every tool is serviced, calibrated and deployment-ready, supported by experienced engineers prepared to respond at a moment's notice.

DEEPPULSE™ AI-DRIVEN PROCESSING

Our proprietary AI engine processes millions of data points to deliver accurate defect mapping, sizing and visualisation — eliminating manual interpretation, reducing turnaround time and increasing confidence in every result.

- ✓

AI-driven defect detection & sizing
- ✓

Instant A-scan data processing utilizing proprietary ultrasonic data processing algorithms
- ✓

Advanced reprocessing ensures complete inspection data coverage
- ✓

Integrated fitness for service capabilities for instant defect assessment results
- ✓

Instant automated inspection report generation
- ✓

Advanced 3D modelling and high-resolution C-scan visualization

PERFORMANCE YOU CAN TRUST

±0.1 mm

ACCURACY

Defect sizing accuracy

±50 mm

AXIAL LOCATION

Defect axial location accuracy

4 mm @ 95%

POD

SAMPLING RATE

High-frequency data sampling

FULL DATA COVERAGE

SEE EVERYTHING. MISS NOTHING.

CLEAN. VERIFY. INSPECT.

- DECOKING**
High-performance mechanical cleaning from our partners removes internal fouling using advanced bidirectional pigging systems.
- INTERNAL FOULING SCANS**
The intelligent pig confirms cleaning effectiveness, locating and quantifying any remaining coke or fouling.
- INTELLIGENT INSPECTION**
30,000+ measurements per linear foot with overlapping data coverage ensures all defects are accurately located and measured.
- AI ANALYSIS**
AI driven software with advanced automated analysis algorithms.
- 3D DIGITAL INSPECTION REPORT**
Fully Interactive 3D C-scans, and defect tables for complete pipeline visibility.
- A-SCANS**
Full A-scan recording for absolute measurement verification and confirmation.
- FFS / REMAINING LIFE ASSESSMENT**
Level 1, 2 & 3 Fitness for Service carried to API 579 standards by a team of integrity and metallurgy experts.

ULTRASIGHT TECHNOLOGY

- ▶ Exceptional accuracy and repeatability
- ▶ 9DOF IMU 10 MEMS for pig location mapping
- ▶ Overlapping data coverage
- ▶ Ultra high-resolution ultrasonic sensors
- ▶ Exceptional strength-to-weight ratio
- ▶ Aerospace-grade 7068 aluminium construction
- ▶ 3 to 12-inch diameter capabilities
- ▶ Inspects finned and studded tubes
- ▶ Short-radius 1D bend capability
- ▶ Untethered
- ▶ Bi-directional
- ▶ Patented modular construction

WHAT WE MEASURE

- ◆ Internal Corrosion
- ◆ External Corrosion
- ◆ Pitting
- ◆ Dents
- ◆ Ovality
- ◆ Mechanical creep / Bulging
- ◆ Historic Repairs & Inserts
- ◆ Internal Fouling / Coke
- ◆ Corrosion under insulation
- ◆ Gouging
- ◆ Grooves & tracking
- ◆ XYZ positioning (3D & Maps overlay)

WHAT WE DETECT

UltraSight™ detects and maps the full spectrum of pipeline defects — from internal and external corrosion, pitting, dents, ovality and gouging, to mechanical creep, grooves, historic repairs and corrosion under insulation — all with full XYZ positioning and 3D map overlays.

STANDARDS WE WORK TO

API RP 573

Inspection of Fired Boilers & Heaters

API 579 / ASME FFS-1

Fitness for Service

API 1163

Inline Inspection Systems Qualification

POF 100 | 300 | 500

Recommended Practices

ISO 9001

Quality Management

INTELLIGENT PIGGING vs HANDHELD UT

CRITERIA	HANDHELD UT	ULTRASIGHT INTELLIGENT PIG
Access	Difficult / Limited	✓ Full Piping Access
Scaffolding	Extensive	✓ Minimal
Data Density	Low	✓ Ultra-High
Repeatability	Operator Dependent	✓ Automated & Consistent
Remaining Coke Detection	No	✓ Yes – Thickness & Location
Reporting	Limited - Tabulated	✓ Interactive 3D Digital Reports
Insp. Time	Long / Labor Intensive	✓ Fast & Efficient
Overall Cost	Higher (with downtime)	✓ Lower Total Cost

EXPERIENCE YOU CAN TRUST

At WASP, we believe that data is only as good as the people who collect and interpret it. Our team of specialist inspection engineers brings decades of combined experience in intelligent pigging across the refining, petrochemical, power generation and industrial sectors. Every inspection is led by qualified ultrasonic pigging experts who understand not just the technology, but the operational realities of the assets they inspect. We operate to ISO 9001 quality management standards and are committed to delivering safe, efficient operations on every project — from initial access planning through to final integrity assessment. With over 75 years of combined experience and a track record spanning 40+ countries, you can trust WASP to give you the certainty your assets demand.
